DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-8, in the reply filed on 02/13/2006 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 4-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Abler.

As a note, Abler meets the recitations that the web or tube is made from paper sheet stock in claims 2 and 5 by disclosing "Although in the preferred embodiment the lay-flat tubing is composed of an extruded seamless plastic, in other embodiments the lay-flat tubing may be composed of paper...", see column 6, lines 25-28.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abler.

Abler discloses the claimed invention except it is uncertain if the legend 80 on each container indicates a monetary denomination. It would have been an obvious matter of design choice to have the legend 80 of Abler bearing indicia indicating a monetary denomination, since applicant has not disclosed that individual wrappers or tubes bearing indicia indicating a monetary denomination solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with the legend bearing indicia indicating a monetary denomination.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
